PROBLEM STATEMENT:

In many urban areas, low-income groups have limited access to quality education, leading to persistent economic inequality

Explanation:

Quality education is a critical component in breaking the cycle of poverty and promoting economic mobility. However, in many urban areas, low-income groups often face significant barriers in accessing the resources and opportunities needed to succeed academically.

Understanding the Education Gap

01 Achievement Gaps

Low-income students often lag behind their higher-income peers in academic performance and standardized test scores.

02 College Enrollment

College enrollment and completion rates are substantially lower for students from low-income communities.

QUESTIONS ASKED IN SURVEY FORM

What are the primary barriers to education faced by your community?

- ☐ Lack of access to affordable schools
- ☐ Poor quality of educational resources
- ☐ Limited availability of skilled teachers
- ☐ Insufficient technological facilities

What type of support would be most beneficial to improve educational access?

- ☐ Free or affordable tutoring services
- ☐ Digital literacy programs
- ☐ Vocational training programs
- ☐ Financial assistance for educational materials
- ☐ Extracurricular skill-building activities

How likely are you to participate in or support a community-based education center?

- ☐ Very likely
- ☐ Somewhat likely
- ☐ Neutral
- ☐ Unlikely
- ☐ Very unlikely

Empathy Tools Used To Address The Problem

A

Conduct one-on-one interviews and small focus groups with students, parents, and educators.

Interviews and Focus Groups

B

Create journey maps for students, parents, and teachers, detailing their daily routines, touchpoints, challenges, and emotions.

Journey Mapping

C

Walk with students or parents in their community to understand physical access barriers

Community Walk-Alongs

PRIMARY NEEDS

- **Infrastructure**

Establish physical locations for community-based education centers.
Ensure facilities include classrooms, computer labs, and accessible utilities.

- **Technology**

Computers, internet access, and digital tools for learning.
Educational software for digital literacy and skill-building.

- **Faculty and Staff**

Skilled teachers for academic subjects.
Trainers for vocational and technical programs. Mentors for personal development

- **Curriculum and Resources**

Customized curriculum for tutoring, digital literacy, and vocational training.
Educational materials such as books, workbooks, and multimedia resources.

SECONDARY NEEDS

- Extracurricular Activities**

Arts, sports, and cultural programs to foster creativity and teamwork.
Clubs for debate, coding, or other interests to enhance engagement.

- Parent and Community Involvement**

Workshops for parents on the importance of education and support strategies.
Community events to build relationships and encourage participation.

- Awareness Campaigns**

Promoting the importance of education through local campaigns and social media.
Reaching out to underserved communities to increase enrollment.

LATENT NEEDS

- **Advanced Skill Development**

Offer specialized courses in trending fields like AI, coding , etc;
Programs to bridge the gap between basic education and advanced careers.

- **Collaboration with Tech Giants**

Partnerships with companies like Google, Microsoft, or local tech startups for resources, workshops, and certifications.

TYPES OF USERS

MAINSTREAM USERS

- **Parents from Low-Income Families:**

Concerned about the quality of education their children receive.
Interested in affordable tutoring and skill-building programs.
Look for safe and trustworthy community initiatives.

- **Youth and Adults Seeking Skills:**

Individuals aiming to improve their employability through digital literacy or vocational training.
Value practical skills that can lead to immediate job opportunities or income generation.

LEADSTREAM USERS

- **Early Adopters of New Educational Initiatives:**
Actively seek solutions to bridge educational gaps in their community.
Willing to experiment with new teaching and learning methods.
- **Community Advocates and Influencers:**
Respected figures who can rally others to participate in the program.
Often serve as the voice for underserved groups.

EXSTREAM USERS

- **Highly Disadvantaged Individuals:**

Children or adults with no access to formal education due to severe poverty or marginalized status. May include individuals from homeless families or minority groups facing discrimination.

- **Overachievers from Low-Income Groups:**

Exceptionally motivated individuals striving for excellence despite limited resources. Often self-learners or those who seek out any available opportunities for education.

IDEATION METHOD-SCAMPER

1. Collaborative Techniques

Purpose: Leverage group creativity and teamwork.

- Brainstorming: Open sharing of ideas without judgment.
- Mind Mapping: Visualizing connections between concepts.
- Affinity Diagrams: Grouping related ideas for deeper insights.
- Round Robin: Each participant contributes one idea in turn.
- Co-Design: Engaging stakeholders in the ideation process.

IDEATION METHOD-SCAMPER

2. Analytical Techniques

Purpose: Structured and logical approaches to ideation.

- SWOT Analysis: Assessing strengths, weaknesses, opportunities, and threats.
- SCAMPER: Substituting, Combining, Adapting, Modifying, Putting to other use, Eliminating, and Rearranging.
- Reverse Engineering: Breaking down existing solutions to inspire new ones.
- Lotus Blossom: Expanding a central idea into sub-ideas.
- Root Cause Analysis: Identifying fundamental problems to develop solutions.

Iterating

Address User Pain

Points: Your project addresses key pain points by providing essential education information, offering career guidance and mentorship, and helping students find financial aid. It also fosters a supportive community. This empowers students to achieve their educational and career goals..

Enhance Accessibility:

similarly for enhanced accesabilityYour project enhances accessibility by providing critical education information, offering personalized career guidance and mentorship, and aiding in financial aid navigation. It also creates an inclusive community. These features empower all students to reach their educational and career aspirations.

C

Content Creation and Integration

Create and curate engaging content such as success stories, career advice articles, and videos. Collaborate with experts for high-quality talks and webinars, and integrate all content into the website.

Testing and Launch

test the website for functionality and usability. Gather feedback from a small group of users, make necessary adjustments, finalize content, and prepare a launch plan

TEAM EXPERIENCES

- 1. The Power of Collaboration**
We came together as individuals from diverse backgrounds, but our shared goal of addressing educational inequality united us. Brainstorming sessions turned into moments of creative breakthroughs, where every idea—big or small—was valued and built upon.
- 2. Walking in Their Shoes**
Empathy became our compass. Through heartfelt conversations with students, parents, and educators, and walking the streets of underserved communities, we experienced their challenges firsthand. These moments transformed our perspective and deepened our commitment.
- 3. Facing the Challenges, Together**
The road wasn't always smooth. Balancing differing viewpoints, limited resources, and ambitious goals tested us. But each hurdle strengthened our resolve and taught us the art of finding solutions through perseverance.

THANK YOU
